SEED LIST – MAY 2020

Section 1 seed has been donated by a collector in South Africa and consists of open pollinated seed from plants in his Tulista collection. (Tulista is the new name for *Haworthia kingiana*, *H. marginata*, *H. minima* & *H. pumila*.)

The first lot (301) is the remainder from the December 2019 listing and will be our selection of 5 or more different packets from different mother plants from the four species wherever possible. Germination tests have given approx. 25% germination in the traditional method but up to 50% when sown on damp kitchen paper, hence the reason they are free.

The remainder in this section are from a recent donation and are from plants that are from various localities in the general areas listed. Again, they are open pollinated but will produce some beautiful plants. This seed was harvested late 2019/early 2020 and stored in dry conditions so germination hopefully should be good. Each of the mother plants come from different localities and should produce some very attractive seedlings. However, it is very important that the resulting seedlings are labelled as hybrids, e.g. *T. pumila* (Worcester area) X

Section 2 is seed is from previous lists and from Johann Bouwer, Obesa Nursery, Graaff Reinet, South Africa.

Section 3 is some non-Haworthioid seed from Neil Davis in Australia.

All 5 seeds per packet except where stated.

No restriction on numbers of packets in sections 2 & 3 (except 226 very few left).

50p = £0.50 and 25p = £0.25

Check www.haworthia.org for updates on availability.
