

Haworthia Society

Seed List – December 2019

Section 1 seeds have been kindly donated by a collector in South Africa and consist of open pollinated seeds from plants in his Tulista collection. (Tulista is the new generic name for *Haworthia kingiana*, *H. marginata*, *H. minima* and *H. pumila*).

Seeds were harvested in mid-2019 and stored in dry conditions so germination hopefully should still be good. Many of these seeds are in very short supply so impossible to list individually. Each of the mother plants comes from different localities and should produce some very attractive seedlings; however, it is very important that the resulting seedlings are labelled as hybrids, e.g. ***T. pumila* (Martiensvallei) X**. **Full habitat details of the maternal parent will be on each seed packet.**

They will be our selection of 5 different or 10 different packets from different mother plants from the four species wherever possible.

Section 2 seeds are from previous lists and from Johan Bouwer (JBO), Obesa Nursery, Graaff Reinet, South Africa.

Section 3 seeds are the remainder of seeds that were donated by Les Percy consisting of open pollinated seeds from plants in his collection as featured in the October list.

Names used are those supplied by the Seed Donors.

All 5 seeds per packet except where stated.

Only one item (300 or 301) from section 1. No restriction on numbers of packets ordered from sections 2 and 3.

50p = £0.50 and 25p = £0.25

Check www.haworthia.org for updates on availability.
